# Front-End Web Developer

Cintoo is a fast-growing startup developing a SaaS platform at the convergence of Reality Capture and Digital Twins. We are searching for flexible go-getters who welcome the challenge of meeting the needs of a fast-growing business. Cintoo Cloud improves the performance and efficiency with a complete cloud-based, collaborative Scan & BIM platform to manage and distribute Reality Capture data, such as laser scans, with no compromise on accuracy. To date, our customers have used our platform to capture over 2 billion square feet in active projects, across hundreds of sites in many countries spanning industries such as manufacturing, construction and energy.

We are seeking, for a permanent position (CDI), a talented and passionate software development engineer, specialised in modern Front-End.

You will join a startup working on cutting-edge technologies with a tremendous growth perspective and a dynamic and innovative atmosphere: you will have fun!

**Responsibilities**:

- Design, develop and maintain the Cintoo Cloud front-end web application, which allows the management, visualization and sharing of 3D projects.
- Define the specifications of this application in collaboration with Quality Assurance, Product Management and Infrastructure teams.
- Ensure the application remains up-to-date with the latest web standards and security requirements, and is developed with the best software engineering practices.
- Analyse and optimise the performance of the application to ensure the best user experience.

**Requirements:**

- Expert knowledge of JavaScript/TypeScript and modern web frameworks (Vue.js or similar).
- Expert knowledge of HTML5.
- Minimum of 5 years of professional experience
- Rigorous development methods (notably test-driven development and clean code architecture) and passion for beautiful code (clean code).
- Knowledge of secure web development.
- Knowledge of web responsive design.
- Self-reliance, innovative spirit, team player.
- Willing to learn and progress.
- Good level in written English.
- Work permit for France.

**Optional desired skills:**

- Knowledge of progressive web application design.
- Experience in web and UX design (Figma).

We are based in Sophia-Antipolis (South of France, 300 days of sunshine per year, great place to be!) Working remotely from anywhere in France is possible.

Remuneration according to profile.

**Please send your resume to jobs@cintoo.com.**
