

Site Reliability Engineer

Cintoo is a fast-growing startup developing a SaaS platform at the convergence of Reality Capture and Digital Twins. We are searching for flexible go-getters who welcome the challenge of meeting the needs of a fast-growing business. Cintoo Cloud improves the performance and efficiency with a complete cloud-based, collaborative Scan & BIM platform to manage and distribute Reality Capture data, such as laser scans, with no compromise on accuracy. To date, our customers have used our platform to capture over 2 billion square feet in active projects, across hundreds of sites in many countries spanning industries such as manufacturing, construction and energy.

We are seeking, for a permanent position (CDI), a talented and passionate site reliability engineer / Cloud engineer.

You will join a startup working on cutting-edge technologies with a tremendous growth perspective and a dynamic and innovative atmosphere: you will have fun!

Responsibilities:

- **Operate** Cintoo Cloud production environment (Cloud infrastructure, network, databases, integration with external systems) to ensure the stability and security of the platform.
- **Design** and put in place build, test and deployment automation and monitoring.
- **Administrate** the internal tools supporting development and business operations.
- **Collaborate** with the development and QA teams to improve the scalability, reliability and security of the product.

Requirements:

- Very good knowledge of Linux, Docker, Kubernetes, networking (TCP/IP, HTTP)
- Experience with Azure and/or AWS.
- Knowledge of scripting languages (Python, bash).
- Experience with provisioning tools (e.g. Terraform).
- Experience with a CI / CD platform (e.g. Bamboo, Jenkins, GitLab, Azure DevOps).
- Database administration (MySQL, PostgreSQL, ElasticSearch).
- Willing to learn and progress.
- Self-reliance, innovative spirit, team player.
- Good level of written English.
- Work permit for France.

Optional desired skills:

- MS365 / Intune administration and automation.
- Network administration
- Experience with IAM and identity federation (OIDC, SAML).
- Knowledge in Information Security.

We are based in Sophia-Antipolis (South of France, 300 days of sunshine per year, great place to be!) Hybrid work is possible, preferably from location in or close to the Alpes-Maritimes (06).

Remuneration according to profile.

Please send your resume to jobs@cintoo.com.
